The Commissioners appointed at the last Court to examine and report whether the new house built for a Court house for this County has been completed according to contract and right to be received this day returned a report which is ordered to be recorded, and the Court receiving the said house and there being no further necessity for the Court to sitting in this house it is ordered that the present Court be adjourned to the said new Court house and that the future Sessions of this Court and of the Circuit Superior Court of Law & Chancery for this County be held in the said new Court house.

Resolved that we are of opinion the meeting of Justices which established an Hospital during the present year for the suppression of Small Pox in this County acted illegally. But that the Combs have no reason to impugn the motives of any gentleman composing that meeting and as a matter of expedience and public utility all proper charges attending the establishment support and medical attendance on said Hospital should be allowed.
